FUNCTIONAL DAIRY INGREDIENTS

fcingredients.com

FOUNDED IN 1994,

First Choice Ingredients is the premier manufacturer of functional dairy ingredients.

We are recognized as one of the most respected manufacturers of concentrated dairy ingredients derived through fermentation and reaction technologies. Located in the heart of Wisconsin, we are proud to be one of the few companies in the world to concentrate specifically on dairy flavors and components.

Starting with quality raw materials, our dedicated R&D staff relies on their decades of industry experience to build innovative products, providing our customers with high quality dairy ingredient tools for further product development. Our expertise in applications of enzymes and cultures produces finished flavors and building blocks that utilize dairy ingredients. Most of our products are available in paste, powder and/or liquid form.
